

PROJECT DEVELOPMENT PHASE

SPRINT-4

Date	19 November 2022
Team ID	PNT2022TMID34201
Project Name	Natural Disaster Intensity Analysis and Classification using Artificial Intelligence

INTEGRATE THE WEB APP WITH AI MODEL:

After creating the Model, the Model should be integrated with the web app using the Flask application. The coding part is named as app.py and it will be running in the localhost through the generated link. By navigating the localhost the webpage will be visible.

```
73     output = frame.copy()
74     #print("apple")
75     frame = cv2.cvtColor(frame, cv2.COLOR_BGR2RGB)
76     frame = cv2.resize(frame, (64, 64))
77     #frame = frame.astype("float32")
78     x=np.expand_dims(frame, axis=0)
79     result = np.argmax(model.predict(x), axis=-1)
80     index=['Cyclone','Earthquake','Flood','Wildfire']
81     result=str(index[result[0]])
82     #print(result)
83     #result=result.tolist()
84
85     cv2.putText(output, "activity: {}".format(result), (10, 120), cv2.FONT_HERSHEY_PLAIN,
86                 1, (0,255,255), 1)
87     #playaudio("Emergency it is a disaster")
88     cv2.imshow("Output", output)
89     key = cv2.waitKey(1) & 0xFF
90
91     """
92     """# if the `q` key was pressed, break from the loop
93     if key == ord("q"):
94         break
95
96     # release the file pointers
97     print("[INFO] cleaning up...")
98     vs.release()
99     cv2.destroyAllWindows()
100    return render_template("upload.html")
101
102 if __name__ == '__main__':
103     app.run(debug=False, threaded=True)
```

Output

IBM 127.0.0.1:5000/home

127.0.0.1:5000/home

Cyclone

activity: Cyclone

rain, high waves and, very

ground

WildFire

Uncontrolled fire in a forest, grassland, brushland

Type here to search 29°C 10:17 08-11-2022

This screenshot shows a web browser displaying a dashboard with three main sections. The top section is titled "Cyclone" and features a satellite image of a cyclone with the text "activity: Cyclone" and "rain, high waves and, very". The bottom left section is titled "WildFire" and features a photograph of a fire with the text "Uncontrolled fire in a forest, grassland, brushland". The bottom right section is titled "ground" and features a photograph of a building. The browser's address bar shows "127.0.0.1:5000/home" and the taskbar at the bottom shows the date "08-11-2022" and time "10:17".

MODEL DEPLOYMENT:

The trained model which is running in the localhost without any error is deployed in the IBM Cloud for making available for the users to predict the Disaster's type and its intensity. It is integrated with the Flask application.
